Not known.

The frequency of the adverse reactions is defined using the following classification:

- very common (more than 1 of 10 animals suffer from the ADR during one treatment course);

- frequent (more than 1 but less than 10 animals out of 100 animals);
- infrequent (more than 1 but less than 10 animals out of 1 000 animals)
- rare (more than 1 but less than 10 animals out of 10 000 animals);
- very rare (less than 1 animal out of 10 000 animals, including isolated reports).

If a serious impact or other effect, due to the use of this VMP not listed in this leaflet is observed, please inform your veterinarian immediately.

7. ANIMAL SPECIES, FOR WHICH THIS VMP IS DESIGNED

For calves, sheep, goats, swine (pigs), hens and chicken.

8. RECOMMENDED DOSES FOR EACH OF THE ANIMAL SPECIES, ADMINISTRATION ROUTE

Oral administration in the drinking water. Single administration.

Calves – 2 to 4 ml for an animal;

Sheep, goats and swine – 2 to 5 ml for an animal;

Pigs - 0.5 to 2 ml for an animal;

Hens - 10 ml in 2 L of water for 50 to 100 laying hens;

Chickens - 10 ml in 2 L of water for 100 to 200 chickens.

9. ADVICE FOR PROPER ADMINISTRATION

Always use **HYDRO AD₃E[®] hydrosol** exactly as you are told by your veterinarian. If in doubt, ask your veterinarian.

10. WITHDRAWAL PERIOD

Meat and internal organs: zero days.

Milk: zero days.

Eggs: zero hours.

11. SPECIAL CONDITIONS FOR STORAGE OF THE VMP

Keep the medication out of sight and reach of children!

Do not store above 25°C.

Protect from light.

Keep in dry place.

Do not use this veterinarian medical product after its expiry date indicated on the label.

Expiry time after the first opening of the package: 28 days.

Store in a refrigerator at 2 °C to 8 °C.

12. SPECIAL PRECAUTIONSInteractions with other veterinary medicinal products and other forms of interactions:

The presence of unsaturated fatty acids decreases the absorption of vitamins A and D₃. Vitamin E can increase vitamin A absorption. Large doses of vitamin E decrease the effect of iron preparations in animals with anemia. Mineral oil can decrease the absorption of orally administered vitamin E.

Overdose (symptoms, emergency measures, antidotes) if necessary:

Overdose could result in anxiety, loss of appetite, vomiting.

Measures taken in overdosing: treatment with the preparation is interrupted and symptomatic treatment is applied.

13. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED VETERINARY MEDICINAL PRODUCT OR WASTE MATERIALS DERIVED FROM THE USE OF SUCH PRODUCTS

The VMP should not be disposed of together with household wastes or sewage. Ask your veterinarian what to do with the no longer necessary VMPs. These measures would help environmental protection.

14. DATE OF THE LAST UPDATE OF THE TEXT

31/05/2014

15. ADDITIONAL INFORMATION

Please, contact the local representative of the authorization holder for any information concerning this veterinary medicinal product.
